

# PROJECT RESCUE

SWIFTLY RECOVER PROBLEM PROJECTS & ENSURE PROGRAM SUCCESS

## Advanced Leadership and Critical Thinking skills for today's Project Leaders

**Accelerate** project performance and team dynamics with new and game-changing techniques

**Prioritize** issues among conflicting stakeholders

**Clarify** ill-defined or “fuzzy” problems

**Solve** technical problems quickly and effectively

**Make** decisions with the commitment of diverse stakeholders

**Protect** decisions with risk reduction techniques

## Who should attend these courses

- PMO Directors
- Project Leaders & Managers
- Portfolio Managers
- Project Financiers
- Project Coordinators
- Technical SME's and Business Analysts who also run projects
- Professional staff that are looking to increase critical thinking skills through confident problem solving and decision making techniques

# METHODOLOGY

## Top 5 reasons to attend

- 1 EVALUATE** and improve your critical thinking skills for increased performance and results
- 2 ACHIEVE** and solidify stakeholder buy-in and commitment to critical decisions with confidence
- 3 ELIMINATE** wasteful outcomes by using divergent and convergent thinking techniques
- 4 CASCADE** and promote improved performance in your organization with enhanced diagnosis and problem solving abilities
- 5 ENGAGE** in hands-on, in-depth discussions and exercises on improving leadership and management through rational, intuitive and systematic decision making

PROJECT RESCUE SWIFTLY IDENTIFY AND RECOVER PROBLEM PROJECTS

## KEPNERandFOURIE™ Legacy

KEPNERandFOURIE™ Thinking Technologies traces its origins back to 1997. When Dr. Chuck Kepner and Dr. Matt Fourie collaborated on the design and delivery of problem solving and decision making techniques to some of the leading companies in the world. Companies that required better, faster, and more flexible techniques to improve performance.

# ADVANCED CLASSES FOR SENIOR PMP'S

Complete these consecutive courses and  
lead team projects to new heights

## Course Overview

### Project Rescue I

Learn to lead group consensus thinking to determine the key/core issues underlying the problem situation.

- Help your teams address the correct 20% of issues causing 80% of the project difficulties
- Analyze seemingly unsolvable project situations and emerge with actions that address the situation successfully
- Identify blind spots and proactively protect projects before they launch

### Project Rescue II

Implement a structured approach to determine causes for project problems and ensure correct actions are taken:

- Obtain innovative methods to get projects “back on track”
- Learn how to crash the ‘critical path’ and give the team ample opportunities to save resources and costs
- Use existing project tools (WBS, RACI, Scorecards, etc.) to improve the 6 C’s: Communication, Collaboration, Coordination, Cooperation, Commitment and Control

## Course Design & Timing

### 5 sessions, 4 hours per session

KEPNERandFOURIE™ processes and tools delivered in this class include:

- Project Health Checklist
- PriorityWise™
- ThinkingWise™
- SolutionWise™ (MaxFour)
- RiskWise™

### 5 sessions, 4 hours per session

Gain powerful solution generation approaches using these processes:

- CauseWise™
- SolutionWise™ (Make a Choice & Create a Solution)
- Project Continuity Analysis
- Interface / Function Analysis
- Stakeholder Performance Matrix
- Concurrent Engineering
- The 6 C’s

“Decision making is the critical act of management. It is the start of all action: good, bad or indifferent.”

– Chuck Kepner
