Tableau Fundamentals

Harness the Power of Your Data – Quickly, Easily and Efficiently

Tableau Basics Get You Started Immediately

This course is designed for the beginner to intermediate-level Tableau user. It is for anyone who works with data – regardless of technical or analytical background. This program helps students understand and use the important concepts and techniques in Tableau to move from simple to increasingly complex data visualizations. From there, transform your data into action through analysis, interpretation and understanding.

Course Includes:

A workbook containing key concepts on each topic covered and hands-on activities to reinforce the skills and knowledge attained. It also includes a digital student resources folder containing Tableau workbooks and data sources to support the hands-on activities.

At the end of this course, you will be able to:

• Connect to your data

• Edit and save a data source

• Understand Tableau terminology

• Use the Tableau interface / paradigm to effectively create powerful visualizations

• Create basic calculations including basic arithmetic calculations, custom aggregations and ratios, datemath, and quick table calculations

• Represent your data using various visualization types

• Build dashboards to share visualizations

Four (4) sessions, 4 hours per session, 16 hours total
16 PDUs/16 Professional Education Hours offered

Prerequisites: None
